SUBJECT: 1979 Consumer Tractors with 3 AMP Electrical Systems

The following 1979 model consumer tractors are equipped with a 3 amp electrical system. This system is similar to the electrical system used on the tractors using the 16 HP Briggs & Stratton engine in that they do not require a regulator rectifier to charge the battery.

Model	Description
24483	5260 8 HP Two Wheel
24484	5460 10 HP Two Wheel
24485	5660 12 HP Two Wheel
24455	8102 10 HP Four Wheel

The other tractors are still equipped with the 15 amp electrical system requiring the regulator rectifier.
