

PRO CHIP 210

If you're looking for a chipper that's compact, highly portable and easy to use, you're looking for Gravely's Pro Chip 210. As the first choice among professionals, the Pro Chip 210 is the smallest of the Gravely chippers, and yet it still has the capacity to handle most clean-ups. Its sound structure — a heavy-gauge, solid steel pan chassis — is fully suspended for easy towing.

separates the Pro Chip 210 from its
competitors is a rotary flywheel
weighing 180 lbs. The momentum of
this large "side-fed" wheel aids in
keeping rotation at full speed, allowing
for more capacity while using less

The distinguishing characteristic that

power. The reversible knives incorporated in the side of the flywheel shave branches across the end as they are side-fed. This means there is less grabbing or whipping of branches from

an operator's hands when feeding the chipper.

Sliced chips are passed through the flywheel and are picked up by the internal Mellow-Tone Fan. These chips

can be thrown up to 40 feet, enabling the loading of a full-size chipper truck.

It is also possible to deflect the chips to the ground for mulch.

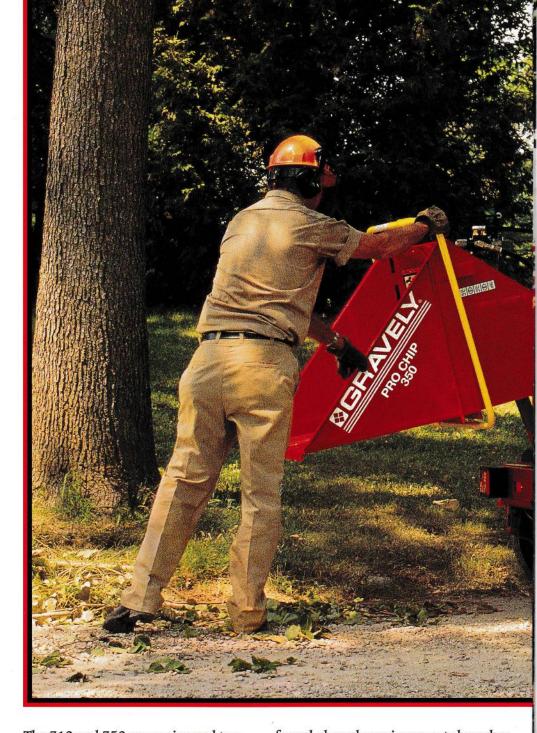

The Gravely Pro Chip 210 PTO is a heavy-duty chipper that will fit any category 1, 3-point hitch. It is capable of chipping limbs up to 6" in diameter.

PRO CHIP 310/350

Gravely takes all the benefits and features of the Pro Chip 210 and adds to it a 360-degree rotating chipper with a hydraulic input to feed from any position. And there you have it, the Gravely Pro Chip 310 and 350 Limb and Brush Chipper.

The Pro Chip 310 or 350's design is based on extensive field research and is engineered to be the perfect size for today's requirements. Its large capacity handles 95% of all chipping jobs and produces small chips salable for mulching as well as many other uses.

As with the 210, the Pro 310 and 350 are highly portable. Made of the same solid structure, they also contain the flywheel design exclusive to Gravely.

The 310 and 350 are engineered to a matched drive train to give maximum rotary inertia, which gives them more inertia than other chippers their size.

With waist-level feeding there is no lifting of heavy branches. The large

funnel-shaped opening accepts branches that other brand units this size can't handle.

A hydraulic input feed roller controls
the intake rate for safer non-whipping
of branches from the operator's hands.
It automatically feeds limb branches

which could be troublesome to feed by hand. The operator control bar allows immediate stop or reverse of feed roller.

As chips are sliced, they are picked up by the internal Mellow-Tone Fan. These chips can be thrown up to 30 feet, enabling the loading of a full-size chipper truck. Chips can also be deflected to the ground for mulch.

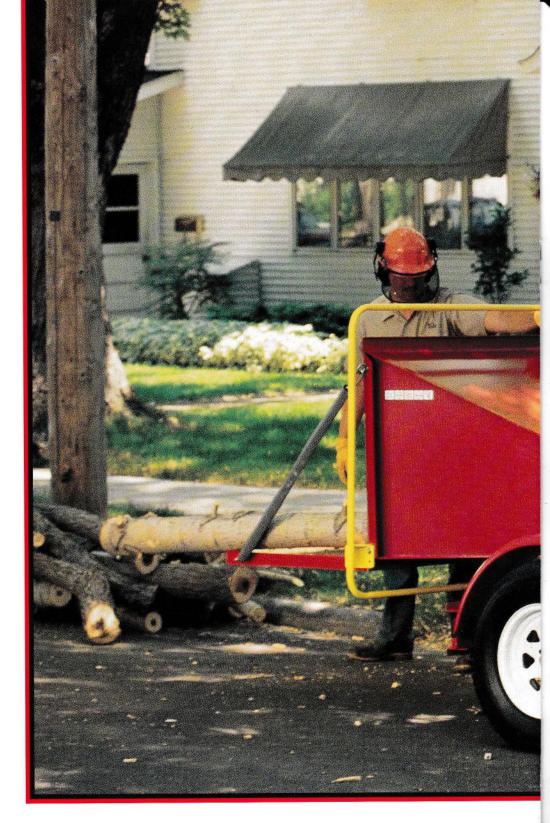

Chipper can be used with a full-size chipper truck or blown on the ground for mulch by rotating the hopper to your desired work position.

PRO CHIP 395

The Gravely Pro Chip 395 Brush Chipper is specifically designed to bring big jobs down to size. It has a 175 FPM feed rate, which is one of the fastest disc-designs in the industry, and the 90-degree feed angle requires 25% less horsepower which results in increased productivity. The 395 is powered by a strong 40.5 HP Yanmar diesel engine and is built to run all day. This diesel engine provides the high torque necessary to tackle large chipping jobs with ease.

With an automatic clutch and operator-friendly controls, it is engineered for commercial use by municipalities and landscapers alike.

The large 30" x 40" funnel-shaped

opening accepts branches and limbs up to 9-1/2" in diameter. The waist-level opening and hydraulic rollers combine to make feeding all types of brush and limbs easy to handle.

Other features of the Pro Chip 395 include a 20" telescoping adjustable tongue, parking stand, and

Full instrumentation and operator-friendly controls for ease of operation.

GRAVELYPro CHIP 495

The best way to introduce Gravely's

Pro Chip 495 is to take everything the

Pro Chip 395 has to offer and double

the horsepower. It's only logical that

the largest of all Gravely chippers comes

with an option of two engines: the 81

HP Perkins or the turbo-charged 102

HP Perkins.

The Pro Chip 495 is engineered to handle the biggest jobs of all. Perfect for municipalities and arborers alike, the large 36" x 44" funnel-shaped opening accepts branches and limbs up to 14" in diameter. Its hydraulic feed system is adaptable for smaller pieces while the capabilities allow up to 200 FPM. And with the hopper positioned off to the left, the operator can stand

safely to the right, along the roadside, out of harm's way.

The Electronic Auto Feed System automatically maintains the engine

speed for maximum performance in all conditions. And the 7" x 7" discharge chute happens to be one of the largest in the industry.

GRAVELY SAFETY STANDARDS

- Meet or exceed safety requirements including tough European CE requirements.
- Special 5 position hydraulic valve for feed rollers that provides a stop for the feed rollers in the upright position and at the end of either direction. Stop bar has a unique color for better visibility. (Featured on the Pro Chip 310, 350, 395, and 495.)
- Specially-designed feed hopper that minimizes access to feed rollers during operation.
- · All rotation shafts are covered.
- Mufflers are guarded.
- Pictorial decals have been added.

GRAVELY FINANCIAL SERVICES

Gravely offers two easy ways to obtain your equipment.

Easy Leasing

The Gravely Four Seasons commercial leasing program is available from your local Gravely dealer.

• Competitive leasing rates

Easy Financing

Gravely's Four Seasons Financing Plan makes it easy for qualified customers to own Gravely precision-engineered grounds care equipment.

 Competitive rates
 Quick approval
 Available at participating U.S. dealers only, Maximum 18% Ani n 18% Annual Percentage Rate. Minimum down payment may be required.

Details of the Limited Warranty are available on request.

To continue its program of quality and design improvement, the manufacturer reserves the right to change specifications, designs, and prices without notice and without incurring obligations.

GRAVELY LIMITED WARRANTY

Gravely International issues a Limited Warranty on all new Gravely equipment as follows:

off all flott diatory equipment at the								
MODEL	CONSUMER USE	COMMERCIAL USE
