

GRAVELLY®

PRO VAC

The Gravelly Pro Vac 1050 professional vacuum is in a class by itself. Turf or pavement, wet or dry, it picks up just about anything and everything. Thatch build-up is greatly reduced because all debris is picked up by air. This means fine grass clippings and crushed leaves from below the grass are lifted out. And since the Pro Vac can vacuum both turf and hard surfaces, you can also depend on it to save you money year after year.

Success Rides on a Gravelly.™ 

PRO VAC

Pro Vac 1050
