

TECHNICAL BULLETIN

Date: October 6, 1978

File Reference: D.I.B. "E" - No. 1537

File Duration: "Permanent"

To: All Gravely Dealers, Branches and Distributors

Subject: **1978 Snowblowers**

The new snowblowers are designed to allow the snowblower reel and wearing strip to both make surface contact.

In the past only the wearing strip made surface contact.

The change was made to assist in removing all snow from a hard surface.

Skids must be used to adjust the height of the snowblower when using on gravel.
