

# new GRAVELLY Snowblower

moves deep snow  
in close places —  
Quickly-easily-economically!

Now you solve one of your most vexing snow removal problems!

Deep snow piled in drives, walks, confined places is moved quickly and economically by the new Snowblower Attachment for the Powerful Gravelly Tractor! Big equipment can't get at these places, hand shoveling is too expensive and inefficient. But the powerful Gravelly Tractor with the new Snowblower will move four-foot-deep snow — wet or dry, hard packed or powdery!

A second or third snowfall while the first is still on the ground is hard to move!

You move the first snow all right with blade-type equipment or hand shoveling, but when the snow is piled

high beside your walks or drives, where can you put the next one? With the Snowblower, you throw the snow as much as thirty feet, to the left or right, at any angle you desire! You keep walks and driveways clear, no matter how many snowfalls you have, because you blow the snow high over the bank from the previous snows!

The Snowblower saves you time and money because it moves snow that previously could only be moved by hand!

A Gravelly Tractor and Snowblower attachment will move more snow in an hour than a four man crew in eight hours. Figure the saving for yourself. And getting a snow-shoveling crew together on short notice is difficult. With your Gravelly Equipment, one operator for the tractor is all that's needed. You are ready to begin work on a moment's notice. And getting the jump on a heavy snow is important!

## QUALITY FEATURES

**ADJUSTABLE SPOUT** throws snow left or right at any angle desired. Easy-to-operate lock holds spout in any position.

**ALL GEAR DRIVE** of steel cut, hardened, bevel gears; with splined axles of steel shafting.

**WIDTH OF SWATH** is 25 inches.

**FAN HOUSING and BLADE** of 12 gauge steel reinforced with angle iron. Electrically welded for long life and strength.

**BALL BEARINGS** at all points of wear.

**FAN BLADES** of 3/16 inch die cut steel, **REEL BLADES** of 1/4 by 2 inch steel.

**SLIP CLUTCH** protects tractor and attachment from damage if obstacles are hit by Reel Blades or Fan.

**RUNNERS** let you skim snow and ice from gravel or blue-stone walks and drives without injuring the surface.

**SWIVEL ACTION** follows rough sections, contour of drives and walks, regardless of position of Tractor Wheels.

## 48 Inch Blade-Type Snow Plow For Snows 18 Inches or Less

If your snowfalls average around 18 inches, the Gravely Blade-Type Snow Plow attachment for the powerful 5 Horsepower Gravely Tractor will solve your snow removal problems easily and economically. Hundreds of municipalities, parks, schools, hospitals and industries have saved the cost of their Gravely Equipment in less than two season's use with this attachment alone!

### Many Uses

The Gravely Blade-type Snow Plow comes in handy for many other jobs—spreading cinders or gravel, bulldozing trash into incinerators, moving loose dirt, covering water and sewer trenches—a multitude of uses.

The 48 inch width of the Blade-Type Snow Plow allows you to clean the average sized driveway in two sweeps, the average walk in one. This economy of motion results in real savings—speeds the job of snow removal.

## Power Brush Moves Light Snow, Sweeps Platforms, Walks, Drives.

Most snows are light, and it is faster and easier to sweep than to shovel them. This is particularly true of loading docks, platforms, courtyards, that are in constant use. When the snow first starts falling, one man with a Power Brush can run over the area at intervals and keep them open and clear with little effort. Since the Power Brush has a sweeping width of 38 inches, it takes only a few minutes to clear these areas.

### Simple, Easy Operation

The Power Brush is easily adjustable to the height desired, easily regulated for sweeping contact. A single lever lifts the Power Brush from contact level for transportation. All brush segments are easily replaced, and are reversible on the shaft. Your choice of fine or coarse bristles, according to your needs.

### Reversible Blade

If you want to move snow in the same direction on a return trip, all you do is reverse the blade of the Gravely Snow Plow by changing a single pin. If you want to bulldoze, change the pin and move the snow straight ahead.

A malleable iron wearing strip on the blade takes all the wear of snow removal. When it gets worn, an inexpensive replacement is available. Your Snow Plow never wears out!

### All Year Use

The Power Brush isn't a seasonal attachment—it has many other uses. Railroads especially make use of the Power Brush during every season of the year for sweeping their stations. Whether it is snow, coal dust, water or mud which has collected at the station, the Gravely Power Brush sweeps it clean the first time over!

# 17 other attachments--Year-round use!

When you purchase a Gravely Tractor, you get a power unit for a system of 20 tools for year-round work. Your investment pays off all year long. Most Industrial and Municipal users of Gravely Equipment keep their tractors busy eight hours a day, almost every day of the year. There is always a job a Gravely can do!

Every one of these 20 attachments can be interchanged in five minutes, by removing and replacing only four bolts!

Here is how this versatility pays off for you. In the winter, your tractor can be used for snow removal, hauling, power brushing of walks, drives, loading docks. In the spring, flower beds or lawns to make, perhaps even some garden work, light trenching and ditching, landscaping, with the Rotary Plow and Cultivating attachments.

When the weeds start springing up you have a Sickle Mower that will cut head-high, thumb-thick brush and weeds, on slopes as steep as 60% when the Tractor is equipped with dual wheels. When the lawns need mowing, you are ready with the 30 inch Reel Mower or if you have large lawn areas, the Gang Units are attached to the center unit, together with a Riding Sulky to make mowing fast and comfortable. In the fall, final mowing, fall ground preparation, hauling, clearing land or felling trees and cutting away brush with the Power Saw.
