## TECHNICAL SERVICE BULLETIN – 1476

TO: ALL GRAVELY OUTLETS

DATE: JULY 15, 1974

SUBJECT: INSTALLATION OF INTERLOCK SYSTEM ON  
GRAVELY 800 SERIES TRACTORS

On June 19th, we installed an interlock electrical system on the 800 series tractors. This system with tractor serial number 23211A.

The interlock system is a safety device that will not allow the tractors to be started when in gear.

When selling these tractors, be sure to explain the system to the customer. This could prevent the customer from calling when his tractor does not start while in gear.

The interlock system is part of the continuing effort by Gravelly to produce the best and safest equipment in our field.
