

1. INSTRUCTIONS FOR SAFE OPERATION

2. OPERATING INSTRUCTIONS

Read this manual carefully and learn to operate and service your 40" / 50" Rotary Mower before using it.

To keep the warranty, the 40" / 50" Rotary Mower must be maintained and operated as directed in this manual.

# 40" ROTARY MOWER & 50" ROTARY MOWER OPERATORS MANUAL

NOTE

Read this manual carefully and learn to operate and service your 40"/50" Rotary Mower before using it.

To keep the warranty, the 40"/50" Rotary Mower must be maintained and operated as directed in this manual.

All references to "left-side", "right-side", "front", and "back" are given from the operator's position.

Look for this symbol to point out important safety precautions. It means -- ATTENTION! BECOME ALERT! YOUR SAFETY IS INVOLVED.

## SECTION 1

### Instructions for Safe Operation

Improper use of this equipment can injure people and damage the equipment. People using or servicing this equipment must read and follow the instructions in this manual.

It is important to understand that this manual and any other Gravely instruction manuals do not cover every possible danger. It is impossible for Gravely to know all possible dangers in operating and servicing the equipment.

The purchaser must give these instructions to the people operating and maintaining this equipment. These people must use eye and foot protection.

#### 1.1 Preparation:

1. Read this manual and the tractor manual carefully.
2. Learn the location and function of all controls.
3. Learn how to use the controls to stop the wheels and mower quickly.
4. Use caution with gasoline. Gasoline is very flammable. Keep it in a clean and tight container away from flames or hot items. Never put gasoline in the fuel tank while the engine is running or hot. Clean up spilled gasoline before starting engine.
5. Be certain that all shields, guards, and interlock switches are in the correct positions.
6. Never permit children to operate the tractor and mower.
7. Inspect area to be mowed and remove all material which could be thrown by the mower.
8. Before starting the engine, put the PTO control lever in the "OFF" position and the gear shift lever in the neutral "N" position.
9. When hauling the equipment, connect the chassis to the transporting vehicle. Never connect from control levers, rods, or like items that could be damaged.
10. Replace all parts that become damaged or lost.

## 1.2 Operation:

1. Wear foot and eye protection. Do not wear loose clothing.
2. Do not use the equipment in the dark without adequate lighting.
3. Keep the equipment in good condition. Maintain it as directed in this manual.
4. USE ONLY GRAVELY ACCESSORIES AND ATTACHMENTS.
5. Do not overspeed the engine. Do not override the governor.
6. Keep away from moving parts.
7. Keep people and animals away from the operating area.
8. Do not let people other than the operator near the operating equipment.
9. Use a slow speed and engage the direction control lever slowly when operating on slopes.
10. Look for and keep away from hazards.
11. After hitting an object, stop the equipment and engine. Check for damage. Repair any damage before operating.
12. Look behind when operating in reverse. Look for people and hazards.
13. Operate only from the operator's position, just behind the handlebars or on the tractor seat.
14. Travel across slopes with the walk-behind tractor. Travel up and down slope with the ride-on tractor.
15. If there is a sudden change in the sound or vibration of the equipment, stop the engine and check for damage. Repair any damage or failure before continuing operation.
16. Never run the engine indoors except to move it outside. Exhaust fumes are dangerous.
17. Go slowly on slick surfaces.
18. Follow traffic laws when operating on or near a road.
19. Before making adjustments or servicing, move the PTO to "OFF," turn the ignition switch to "OFF," and wait until all moving parts completely stop.
20. Before leaving the operator's position, put the PTO lever in the "OFF" position, turn the ignition key to the "OFF" position. Move the direction control lever to forward position (walk-behind tractor). Set the brake lock for parking (ride-on tractor).

## SECTION 2

### Operating Instructions

- 2.1 Transport the equipment to the area to be mowed.
- 2.2 Inspect the area to be mowed and remove all material which could be thrown by the mower.
- 2.3 Plan the pattern for cutting the grass. Generally an area is mowed around the periphery towards the center by discharging the grass toward the center on the first pass. The remainder of the mowing is done discharging the grass outward in the area which has been cut.
- 2.4 See Section 7 for the schedule of heights of cut. Set the mower for the height of cut desired.
- 2.5 See the tractor manual for correct operation of the PTO. Start the engine and put the PTO Control in the "ON" position. Move the throttle control to the "FAST" position.
- 2.6 Select a slow gear. Engage the forward clutch. Control the ground speed by selecting the desired gear.

## SECTION 3

### Service Instructions

#### 3.1 Lubrication:

1. Every eight hours of operation apply multi-purpose grease to the lube fittings on:
  - a. Each spindle (3)
  - b. Each gauge wheel (2)
  - c. Drive shaft
  - d. Front mount--quick hitch pin
    - each caster wheel (2)
    - each caster fork (2)
2. Gear Box: Once a year or every 200 hours of operation, check the lubricant by removing the cover. Clean the top of the gear box and carefully remove the cover. Replace the gasket if damaged. Keep the gear box 3/4 full of grease.

### 3.2 Blade Service:

1. Every ten hours of operation or when the cut is poor visually, check the blades for sharpness.
2. Remove the mower from the tractor. See Sections 3.6 and 3.7.
3. Turn the mower upside down.
4. Block the blades and remove the nuts and flat washers from the spindle.
5. Sharpen and balance the blade.
6. Reverse the removal process to install the blades on mower and the mower on the tractor.
7. Replace the blades when over 1/2" has been removed or the blade cannot be balanced.

3.3 Height of Cut Adjustment: Lift up on the height adjustment lever and rotate the axle pivot weldment until the lever registers with the slot corresponding to the desired height of cut. The lowest cut position is when the lever is nearest the deck.

### 3.4 Belt Adjustment:

1. Remove the right belt cover.
2. Unlock the adjusting nuts. See Figure 1.
3. Rotate the inside nut until the air gap in the spring is .010" to .015" (.25mm to .38mm).
4. Jam the adjusting nuts.
5. Install the belt cover.

### 3.5 Belt Replacement:

1. Remove the mower from the tractor.
2. Remove the belt covers.
3. Loosen the spring tension on the belt.
4. Remove the gear housing support.
5. Remove the belt.
6. Put the new belt in position on the sheaves. See Diagram 1.
7. Mount the gear housing support.

- 1 - Adjusting Nut
- 2 - Jam Nut
- 3 - Spring

84019

FIGURE 1

DIAGRAM 1

84020

8. Adjust the belt tension.
9. Install the belt covers.
10. Mount the mower on the tractor.

### 3.6 Mower Installation on the Two-Wheel Tractor:

1. Put a film of grease on the quick hitch pin. See Figure 2.
2. Slide the pivot support onto the quick hitch pin and retain with a flat washer and klik pin.
3. Put a film of grease on the shaft of the universal drive assembly. Slide the shaft into the tube of universal joint (female) assembly.
4. Pull (or rotate) the locking collar toward the U-joint and slide onto the tractor PTO shaft. Release the locking collar. Pull on the drive to make sure that the drive has locked in place.
5. To remove the mower, reverse the steps above.

84021

| 5 - U-Joint Female  | 10 - Height Adjustment Lever |

FIGURE 2

### 3.7 Mower Installation on the Four-Wheel Tractor:

1. Install the lift rod on the tractor as shown in Diagram 2. Use the first hole in the end of the lift arm when mounting on a long frame tractor.
2. Put a film of grease on the shaft of the universal joint (male) assembly. Slide the shaft into the tube of the universal joint (female) assembly.
3. Put the height adjustment lever in the lowest cut position (near deck).
4. Position the tractor with the front wheels behind the mower.
5. Roll the front of the tractor over the mower. Be careful that the tire does not roll over the height adjustment lever. See Figure 3.
6. Put a film of grease on the PTO shaft.
7. Unlock the universal joint drive assembly locking collar by rotating or pulling toward the drive assembly. Slide the drive assembly on the PTO shaft and release the locking collar. Pull on the drive assembly to make sure it is locked on the PTO shaft.
8. Lower the attachment lift.
9. Put the end of the lift rod in the eye bolt on the mower. Secure with a hair pin cotter.
10. Lift the mower with the attachment lift until the mower pivot arm is near the latch plates.
11. Open the latch plates and swing the pivot arm into the slots.
12. Close the latch plates and secure with hair pin cotters. See Figure 4.
13. To remove the mower, reverse the installation procedure.

### 3.8 Mower Level Adjustment:

1. Park the tractor on a level, paved surface.
2. Move the height adjustment lever to the position where the mower will be used.
3. Loosen the bolts which attach the adjustment plates.
4. Block the front of the mower so that it is level. See Diagram 3.
5. Push the adjustment plates down tight against the axle pivot. Tighten the bolts.

## SECTION 4

### Storage

- 4.1 Remove the mower from the tractor and clean.
- 4.2 Inspect for damage, wear, loose or missing hardware. Repair as needed.
- 4.3 Sharpen and balance the blades.
- 4.4 Lubricate.
- 4.5 Paint any bare areas.
- 4.6 Place in a dry area.

## SECTION 5

### Solving Problems

#### Problem Chart:

OBSERVATION	POSSIBLE CAUSE
1. Uneven cut	Deck not level Uneven tractor tire pressure Damaged gauge wheel or axle Damaged pivot arm weldment Bent blade
2. Uncut grass	Dull blade Damaged blade Too low engine speed Mowing tall grass
3. Smoke from mower	Spindle/blade locked Debris wedged against belt Loose belt
4. Engine slows when mower is engaged	Damaged bearing in spindle assembly Damaged bearings/gears in the gear box
5. Excessive noise	Unbalanced blade(s) Damaged universal joint Damaged gear box bearings/gears Idler bearings Damaged bearings in spindle assembly

## SECTION 8

### Set-Up Instructions

- 8.1 Remove the mower from the shipping container.
- 8.2 Put the axle pivot in position in the axle support brackets. See Figure 5.
- 8.3 Put a nylon stop in each axle support bracket with the curved end against the axle pivot. Secure the nylon stops with  $3/8-16 \times 2$ " carriage bolts from under the deck and  $3/8-16$  lock nuts.
- 8.4 Install a cotter pin in the axle pivot as shown in Figure 6.
- 8.5 Put the height adjustment lever in the slots of the axle pivot and install two cotter pins. See Figure 7.
- 8.6 Install the spring from the axle pivot to the height adjustment lever.

- 8.7 Put the knob on the height adjustment lever.
- 8.8 If the mower is to be used on a long frame tractor, move the universal joint drive assembly to the hole nearest the end of the gear box shaft. See Figure 8.
- 8.9 To mount the mower to the front mount (two-wheel tractor):
1. Remove a pivot arm support from the front mount frame.
  2. Put the front mount frame over the mower and slide the pivot arm shaft into the remaining pivot arm support. See Figure 9.
  3. Slide the loose pivot arm support on the vacant pivot arm shaft and bolt to the front mount frame.
  4. Cut the universal joint assembly shaft to the length shown in Diagram 4.
- 8.10 The mower lift rod is installed and adjusted the first time the mower is mounted on the four-wheel tractor.
1. Put the lift pivot on the lift rod followed by two jam nuts. Leave the nuts loose for adjustment. See Diagram 5.
  2. See Section 3.7. Secure the mower in the latch plates.

3. Lower the attachment lift. Install the lift pivot in the second hole of the lift arm. See Diagram 5. Put the lift pivot in the first hole on the long frame tractor.
4. Adjust the mower to the lowest height of cut position. Put the end of the lift rod in the mower eye bolt and secure with a hair pin cotter.
5. Move the first jam nut to an 1/8" from the lift pivot and lock it in place by jamming with the second nut.
6. Follow Section 3.7 for installation and removal of the mower on the tractor.

SECTION 9

GRAVELY LIMITED WARRANTY

This Limited Warranty is issued by Gravely International, Inc., and consists of the following terms:

1. Only the original purchaser of new Gravely equipment is covered by this Warranty.
2. This Warranty covers repair or replacement of parts manufactured by Gravely which are defective in material or workmanship. Gravely will pay for parts and labor only.
3. The Warranty starts the date of purchase and lasts for TWELVE (12) MONTHS.
4. Some components of Gravely equipment are not covered by the Gravely Warranty. These components are covered by the original manufacturer's warranty, which is included with the product. They are:
  - a. Engines
  - b. Tires
5. To obtain warranty service on Gravely equipment including components not manufactured by Gravely, use this procedure:
  - a. Notify the Gravely dealer from whom you purchased the equipment.
  - b. If you have moved and it is not convenient to notify the selling dealer, notify the nearest Gravely dealer. You should supply this dealer with a copy of the bill of sale as proof of the date of purchase.
  - c. Make arrangements to have the equipment delivered to the dealer (refer to paragraph 6(a) below).
  - d. If you have any questions concerning the Gravely Limited Warranty, they should be referred to:

Gravely International, Inc.  
One Gravely Lane  
Clemmons, NC 27012

Attn: Manager of Customer Services
  - e. Warranty service on Gravely equipment must be performed by an authorized Gravely dealer or Gravely factory branch.
6. This Warranty does not cover the following:
  - a. Transportation between owner's home or place of business and the dealership. If the dealer provides the transportation of the equipment, he will charge the owner his usual rate for such service.
  - b. Normal maintenance services and normal replacement of items such as spark plugs, belts, oil, oil filters, air filters, and mower, plow or cultivator blades.
  - c. Alterations or Modifications - All obligations under this warranty shall be terminated if the equipment is altered or modified in any way.
  - d. Customer Neglect or Lack of Proper Maintenance - The purchaser is responsible for making sure that the tractor is operated and serviced as directed in the operator's manual. Incorrect use or maintenance will void the warranty.
7. GRAVELY MAKES NO OTHER EXPRESS WARRANTIES. ANY IMPLIED WARRANTIES, INCLUDING WARRANTIES AS TO MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, ARE LIMITED IN DURATION TO THE PERIOD SET OUT IN PARAGRAPH 3 ABOVE. SOME STATES DO NOT ALLOW LIMITATIONS ON HOW LONG AN IMPLIED WARRANTY LASTS, SO THE ABOVE STATEMENT MAY NOT APPLY TO YOU.
8. GRAVELY SHALL HAVE NO RESPONSIBILITY FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES RESULTING FROM THE BREACH OF ANY WARRANTY, INCLUDING, BUT NOT LIMITED TO, INCONVENIENCE, RENTAL OR PURCHASE OF REPLACEMENT EQUIPMENT, LOSS OF PROFITS OR COMMERCIAL LOSS. SOME STATES DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THE ABOVE LIMITATION OR EXCLUSION MAY NOT APPLY TO YOU.
9. This Warranty gives you specific legal rights, and you may have other rights which vary from state to state.
10. A Gravely product registration card is supplied with each Gravely product. Please complete the card and return it to Gravely at the address listed on the card. The equipment registration card will be used by Gravely for:
  - a. Recording date of purchase.
  - b. Notification of owners in compliance with the Consumer Product Safety Act, should any notification be necessary.The return of registration card is not required in order to take advantages of this Warranty.
11. This Warranty is not subject to change or modification by anyone, including Gravely dealers and no Gravely dealer is authorized to make any representations or promises on Gravely's behalf.
