

GRAVELY

Power-Barrow!

Here is a new GRAVELY way to save time and effort. The self-dumping Gravelly Power Barrow eliminates hand carrying or manual wheeling of large loads. Let GRAVELY POWER do the work!

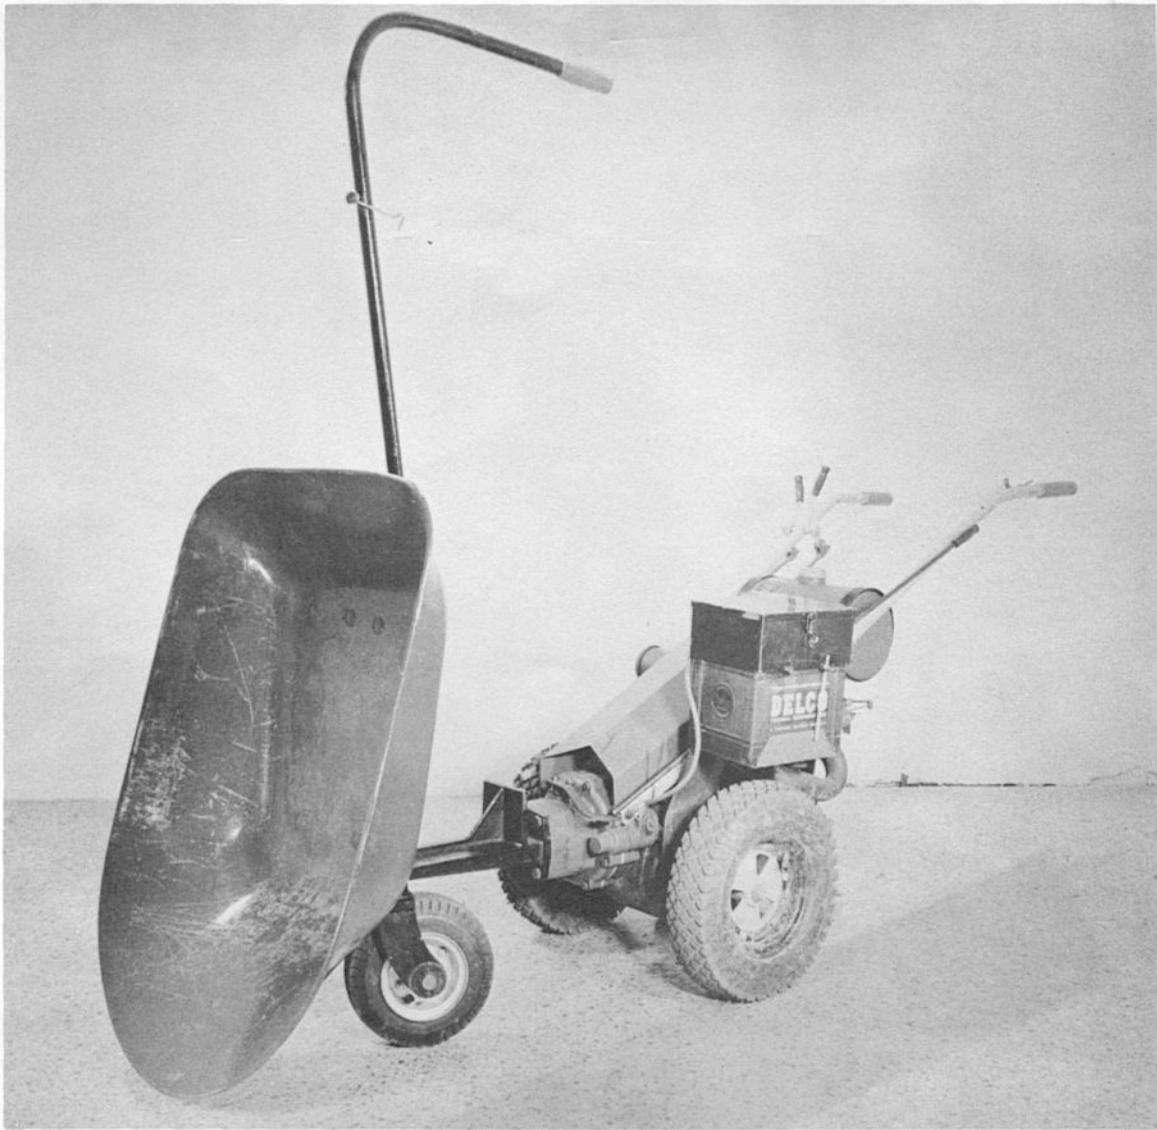

The rugged Power Barrow is of sturdy steel and cast-iron construction. Attaches and removes from your Tractor with just four Bolts.

It easily handles up to a five cubic foot capacity. Haul your sand, cement, gravel, bricks or other heavy loads fast, SAFE!

Gravelly's Power Barrow is self-dumping. Just move the Handle up. See the reverse side for complete instructions.

When you use the Gravelly Power Barrow, the powerful 6.6 HP Gravelly Tractor moves your heavy loads--puts it right where you want it. All you do is guide it.

If you have an Electric Starter, you must obtain a side Battery Mount to use your Starter with the Power Barrow.

Just raise the Handle to dump. The Handle is designed to be always within easy reach of the operator.

You spot your loads exactly where you want them.

A Handle Latch secures your loads when working on slopes or rough terrain.
