

GRAVELY

SEEDING UNITS FERTILIZER DISTRIBUTOR

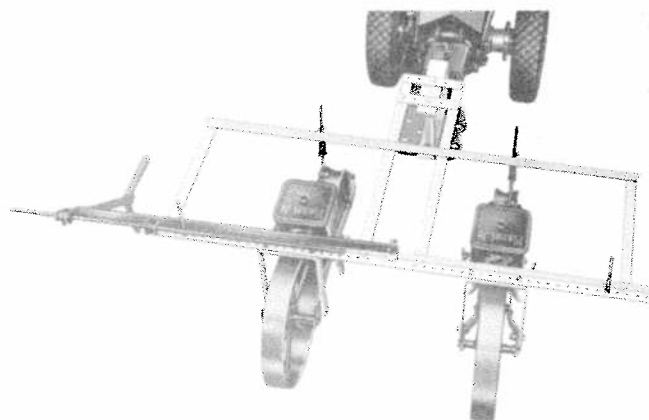

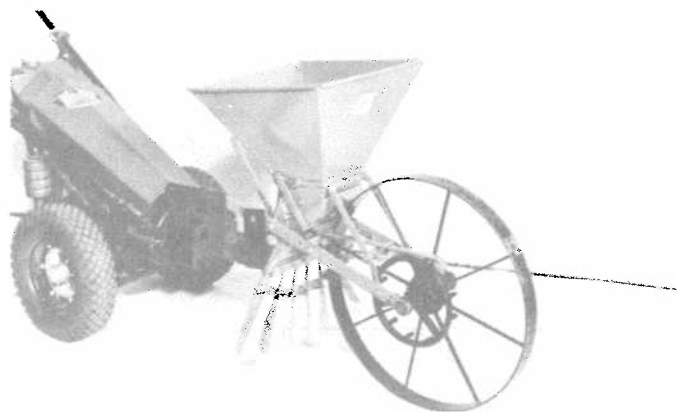

NEW Single Row-Seeder

Now you can seed any garden crop quickly and easily—interchangeable plates allow you to plant large and small seeds as desired—you row, plant and cover in one operation, with power!

Inexpensive and convenient, the single-row seeder and hitch will make your gardening faster and easier.

FERTILIZER DISTRIBUTOR

Scattering fertilizer by hand is a wearisome and time consuming job. The GRAVELY fertilizer distributor spreads evenly through six adjustable spouts, over a width of 4 to 30 inches, from 200 to 2,000 pounds per acre regulated by a simple adjustment. Hopper capacity is 50 pounds.

TWO ROW SEEDER

Two to four seeder units may be used with the two-row seeder. The seeders may be adjusted to the row width you desire. Each seeder handles from the smallest vegetable seeds to bush lima beans.
